#### Trio-Tech Reports Net Income of \$0.17 Per Share for the First Nine Months Of Fiscal 2016 Versus \$0.05 Per Share Last Year

Van Nuys, CA – May 11, 2016 – Trio-Tech International (NYSE MKT: TRT) today announced financial results for the third quarter and first nine months of fiscal 2016:

- Fiscal 2016 third quarter revenue increased 9.5% to \$9,355,000 compared to \$8,543,000 for the third quarter of fiscal 2015.
- Fiscal 2016 third quarter net income was \$0.04 per share compared to \$0.06 per share for the third quarter of fiscal 2015.
- Operating income for the first nine months of fiscal 2016 increased 20.9% to \$950,000 compared to operating income of \$786,000 for the same period of fiscal 2015.
- Net income for the first nine months of fiscal 2016 more than tripled to \$599,000 compared to net income of \$169,000 for the same period of fiscal 2015.

#### **CEO Comments**

S.W. Yong, Trio-Tech's CEO, said, "Trio-Tech delivered another good performance for the third quarter of fiscal 2016 which, combined with our strong first half results, generated an increase in net income to \$0.17 per share for the first nine months of the year compared to \$0.05 per share for the first nine months of fiscal 2015. This increase in profitability in what remains a volatile and uncertain environment in the global semiconductor industry is a significant accomplishment for our company, and justifies our continued confidence in our strategy to offer high quality specialty products and services, backed by first class customer support, in well-established niche markets we have served for many years and understand thoroughly.

"Our renewed focus on our distribution business this past year has been an important source of strength for Trio-Tech, as distribution revenue increased 22.8% for the third quarter compared to the third quarter of 2015, and increased 95.9% for the first nine months of fiscal 2016 compared to the first nine months of fiscal 2015. Offering products manufactured by other companies that are complementary to Trio-Tech's proprietary semiconductor testing products sold through our manufacturing segment, growth in our distribution business helped offset lower nine-month revenue in our testing services business, as well as the negative impact on revenue and operating profitability of a foreign currency translation adjustment reflecting the strength of the U.S. dollar this year compared with the same period last year.

"The decrease in general and administrative expenses for the third quarter and first nine months of fiscal 2016 compared to the same periods of fiscal 2015 also contributed to our improved profitability."

#### Fiscal 2016 Third Quarter Results

For the third quarter ended March 31, 2016, revenue increased 9.5% to \$9,355,000 compared to revenue of \$8,543,000 for the same quarter of fiscal 2015. Manufacturing revenue increased 33.0% to \$4,468,000 for this year's third quarter compared to \$3,359,000 for the same quarter of fiscal 2015. Revenue from the distribution of products manufactured by others increased 22.8% to \$1,232,000 compared to \$1,003,000 in the same quarter last year. These increases were partially offset by a 12.5% decrease in semiconductor testing services to \$3,622,000 for the third quarter, compared to \$4,138,000 for the same period of fiscal 2015, despite an increase in testing volume. The drop in testing revenue reflected a lower margin product mix and lower average testing prices during the period.

## Trio-Tech Reports Net Income of \$0.17 Per Share for the Nine Months Of Fiscal 2016 Versus \$0.05 Per Share Last Year

May 11, 2016 Page Two

Net income attributable to Trio-Tech International common shareholders for the third quarter of fiscal 2016 decreased 24.6% to \$150,000, or \$0.04 per basic and diluted share, compared to net income attributable of \$199,000, or \$0.06 per basic and diluted share, for the third quarter of fiscal 2015. The net income decreased mainly due to foreign exchange losses amounting to \$218,000 in third quarter of fiscal 2016 as compared to \$101,000 for the same period in last fiscal year.

Gross margin for the third quarter was 22.8% compared to 29.1% for the third period last fiscal year. Gross margin decreased mainly due to the change in product mix, which changes frequently as a result of change in market demand. A poor product mix in manufacturing, combined with lower margins from testing services resulted in a lower overall gross margin in this third quarter as compared to the same period in last fiscal year. Operating expenses decreased 10.3% to \$1,809,000 for the third quarter of fiscal 2016 compared to \$2,016,000 for the third quarter of fiscal 2015.

Income from operations for the third quarter of fiscal 2016 decreased 31.6% to \$323,000 compared to \$472,000 for the third quarter of fiscal 2015.

#### Fiscal 2016 Nine Months Results

For the nine months ended March 31, 2016, revenue increased 0.4% to \$25,639,000 compared to revenue of \$25,533,000 for the first nine months of fiscal 2015. Manufacturing revenue increased 11.6% to \$10,884,000 for this year's first nine months compared to \$9,754,000 for the same period a year earlier, and revenue from the distribution of products manufactured by others nearly doubled to \$3,566,000 compared to \$1,820,000. These increases were offset by a 19.7% decrease in semiconductor testing services to \$11,106,000 for this year's first nine months compared to \$13,829,000 for the same period in fiscal 2015, reflecting lower revenue from a major customer in Asia due to lower margin product mix and pricing.

Net income attributable to Trio-Tech International common shareholders for the first nine months of fiscal 2016 more than tripled to \$599,000, or \$0.17 per basic and diluted share, compared to net income attributable of \$169,000, or \$0.05 per basic and diluted share, for the same period last fiscal year.

Gross margin for this year's first nine months was 25.1% compared to 26.4% for the same period last fiscal year. Operating expenses decreased 7.9% to \$5,475,000 for the first nine months of fiscal 2016 compared to \$5,942,000 for the same period last fiscal year. Gross margin improved in manufacturing product sales, but this was offset by a decline in gross margin from the testing services segment. The primary factor contributing to a decline in overall gross margin for the nine month period was the near doubling in distribution sales, where gross margins are typically significantly lower than gross margins from manufacturing and testing services.

Income from operations for the first nine months of fiscal 2016 increased 20.9% to \$950,000 compared to \$786,000 for the same period last fiscal year.

Shareholders' equity at March 31, 2016 was \$20,835,000, or \$5.93 per outstanding share, compared to \$20,722,000, or \$5.90 per outstanding share, at June 30, 2015. There were approximately 3,513,000 common shares outstanding at March 31, 2016 and June 30, 2015.

#### **About Trio Tech**

Established in 1958 and headquartered in Van Nuys, California, Trio-Tech International is a diversified business group with interests in semiconductor testing services, manufacturing and distribution of semiconductor testing equipment, and real estate. Further information about Trio-Tech's semiconductor products and services can be obtained from the Company's Web site at <a href="https://www.universalfareast.com">www.universalfareast.com</a>, and <a href="https://www.universalfareast.com">www.universalfareast.com</a>.

#### **Forward Looking Statements**

This press release contains statements that are forward looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and may contain forward looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and assumptions regarding future activities and results of operations of the Company. In light of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, the following factors, among others, could cause actual results to differ materially from those reflected in any forward looking statements made by or on behalf of the Company; market acceptance of Company products and services; changing business conditions or technologies and volatility in the semiconductor industry, which could affect demand for the Company's products and services; the impact of competition; problems with technology; product development schedules; delivery schedules; changes in military or commercial testing specifications which could affect the market for the Company's products and services; difficulties in profitably integrating acquired businesses, if any, into the Company; risks associated with conducting business internationally and especially in Southeast Asia, including currency fluctuations and devaluation, currency restrictions, local laws and restrictions and possible social, political and economic instability; changes in U.S. and global financial and equity markets, including market disruptions and significant interest rate fluctuations; and other economic, financial and regulatory factors beyond the Company's control. Other than statements of historical fact, all statements made in this Quarterly Report are forward looking, including, but not limited to, statements regarding industry prospects, future results of operations or financial position, and statements of our intent, belief and current expectations about our strategic direction, prospective and future financial results and condition. In some cases, you can identify forward looking statements by the use of terminology such as "may," "will," "expects," "plans," "anticipates," "estimates," "potential," "believes," "can impact," "continue," or the negative thereof or other comparable terminology. Forward looking statements involve risks and uncertainties that are inherently difficult to predict, which could cause actual outcomes and results to differ materially from our expectations, forecasts and assumptions.
