FORWARD-LOOKING STATEMENTS

The discussions of Trio-Tech International's (the "Company") business and activities set forth in this Quarterly Report on Form 10-Q (this "Quarterly Report") and in other past and future reports and announcements by the Company may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and assumptions regarding future activities and results of operations of the Company. In light of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, the following factors, among others, could cause actual results to differ materially from those reflected in any forward-looking statements made by or on behalf of the Company: market acceptance of Company products and services; changing business conditions or technologies and volatility in the semiconductor industry, which could affect demand for the Company's products and services; the impact of competition; problems with technology; product development schedules; delivery schedules; changes in military or commercial testing specifications which could affect the market for the Company's products and services; difficulties in profitably integrating acquired businesses, if any, into the Company; risks associated with conducting business internationally and especially in Asia, including currency fluctuations and devaluation, currency restrictions, local laws and restrictions and possible social, political and economic instability; changes in U.S. and global financial and equity markets, including market disruptions and significant interest rate fluctuations; ongoing public health issues related to the COVID-19 pandemic both nationally and internationally; the trade tension between U.S. and China; inflation; the war in Ukraine; other economic, financial and regulatory factors beyond the Company's control and uncertainties relating to our ability to operate our business in China; uncertainties regarding the enforcement of laws and the fact that rules and regulation in China can change quickly with little advance notice, along with the risk that the Chinese government may intervene or influence our operation at any time, or may exert more control over offerings conducted overseas and/or foreign investment in China-based issuers could result in a material change in our operations, financial performance and/or the value of our common stock, no par value ("Common Stock") or impair our ability to raise money. Other than statements of historical fact, all statements made in this Quarterly Report are forward-looking, including, but not limited to, statements regarding industry prospects, future results of operations or financial position, and statements of our intent, belief and current expectations about our strategic direction, prospective and future financial results and condition. In some cases, you can identify forward-looking statements by the use of terminology such as "may," "will," "expects," "plans," "anticipates," "estimates," "potential," "believes," "can impact," "continue," or the negative thereof or other comparable terminology. Forward-looking statements involve risks and uncertainties that are inherently difficult to predict, which could cause actual outcomes and results to differ materially from our expectations, forecasts and assumptions.

Unless otherwise required by law, we undertake no obligation to update forward-looking statements to reflect subsequent events, changed circumstances, or the occurrence of unanticipated events. You are cautioned not to place undue reliance on such forward-looking statements.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with United States Generally Accepted Accounting Principles (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. All significant intercompany accounts and transactions have been eliminated in consolidation. The unaudited condensed consolidated financial statements are presented in U.S. dollars unless otherwise stated. The accompanying condensed consolidated financial statements do not include all the information and footnotes required by GAAP for complete financial statements. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report for the fiscal year ended June 30, 2022 (“Fiscal 2022”). The Company's operating results are presented based on the translation of foreign currencies using the respective quarter's average exchange rate.

The results of operations for the nine months ended March 31, 2023 are not necessarily indicative of the results that may be expected for any other interim period or for the full year ending June 30, 2023.

Use of Estimates — The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Among the more significant estimates included in these consolidated financial statements are the estimated allowance for doubtful account receivables, reserve for obsolete inventory, impairments, provision of income tax, stock options and the deferred income tax asset allowance. Actual results could materially differ from those estimates.

Significant Accounting Policies. There have been no material changes to our significant accounting policies summarized in Note 1 “Basis of Presentation and Summary of Significant Accounting Policies” to our consolidated Financial Statements included in our Annual Report on Form 10-K for Fiscal 2022.

2. NEW ACCOUNTING PRONOUNCEMENTS

In March 2022, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2022-02 updating Accounting Standards Codification (“ASC”) Topic 326: *Financial Instruments—Credit Losses* (Topic 326): *Troubled Debt Restructurings (“TDR”) and Vintage Disclosures* (“ASU 2022-02”), which require that an entity disclose current-period gross write-offs by year of origination for financing receivables and net investment in leases within the scope of Subtopic 326-20. The Company has completed its assessment and concluded that ASU 2022-02 has no significant impact to the Company’s consolidated financial statements.

In November 2021, FASB issued ASU 2021-10 ASC Topic 832: *Government Assistance* (“Topic 832”): *Disclosures by Business Entities about Government Assistance* (“ASU 2021-10”), which expected to increase transparency in financial reporting by requiring business entities to disclose information about certain types of government assistance received. ASU 2021-10 is effective for financial statements issued for annual periods beginning after December 15, 2021 for all entities except not-for-profit entities and employee benefit plans within the scope of Topics 960, 962, and 965 on plan accounting. The Company has completed its assessment and concluded that ASU 2021-10 is applicable to the Company as the Company received government grants. The Company will make the necessary disclosures in the financial statements for Fiscal 2023.

In June 2016, FASB issued ASU 2016-13 ASC Topic 326, *Financial Instruments — Credit Losses* (“Topic 326”) (“ASU 2016-13”) for the measurement of all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions, and reasonable and supportable forecasts. Financial institutions and other organizations will now use forward-looking information to better inform their credit loss estimates. Many of the loss estimation techniques applied today will still be permitted, although the inputs to those techniques will change to reflect the full amount of expected credit losses. 4. TRADE ACCOUNTS RECEIVABLE AND ALLOWANCE FOR DOUBTFUL ACCOUNTS

Accounts receivable are customer obligations due under normal trade terms. The Company performs continuing credit evaluations of its customers' financial conditions, and although management generally does not require collateral, letters of credit may be required from the customers in certain circumstances.

Senior management reviews accounts receivable on a periodic basis to determine if any receivables will potentially be uncollectible. Management includes any accounts receivable balances that are determined to be uncollectible in the allowance for doubtful accounts. After all reasonable attempts to collect a receivable have failed, the receivable is written off against the allowance. Based on the information available, management believed the allowance for doubtful accounts as of March 31, 2023, and June 30, 2022, was adequate.

Limited (“Joint Venture” or “Junzhou”), to jointly develop the “Singapore Themed Park” project (the “Project”). The Company paid RMB10,000 for the 10% investment in the Joint Venture. The Developer paid the Company a management fee of RMB 5,000 in cash upon signing of the Agreement, with a remaining fee of RMB 5,000 payable upon fulfilment of certain conditions in accordance with the Agreement. The Company further reduced its investment by RMB 137, or approximately \$22, through the losses from operations incurred by the Joint Venture.

In Fiscal 2014, the Company disposed of its entire 10% interest in the Joint Venture but, to date, has not received payment in full. The Company recognized a disposal based on the recorded net book value of RMB 5,000, or equivalent to \$803, from net considerations paid, in accordance with GAAP under ASC Topic 845 Non-monetary Consideration. It is presented under “Other Assets” as non-current assets to defer the recognition of the gain on the disposal of the 10% interest in the Joint Venture investment until such time that the consideration is paid, so the gain can be ascertained.

The shop lots are to be delivered to TTCQ upon completion of the construction of the shop lots in the Project. The initial targeted date of completion was in the fiscal year ended June 30, 2017. However, the progress has been delayed as the developer is currently undergoing asset reorganization process, to re-negotiate with their creditors to complete the project.

During the fourth quarter of Fiscal 2021, the Company accrued an impairment charge of \$1,580 related to the doubtful recovery of the down payment on property in the Project in Chongqing, China. The Company recorded a non-cash impairment charge due to increased uncertainties regarding the project’s viability, given the developers weakening financial condition as well as uncertainties arising from the negative real-estate environment in China, implementation of control measures on real-estate lending in China and its relevant government policies, together with effects of the ongoing pandemic. The local court is verifying the documents due to the sizable number of creditors as of March 31, 2023.

GILTI expense was \$Nil and \$83 for three and nine months ended March 31, 2023, as compared to \$Nil for the same period in fiscal 2022.

The Company's income tax expense was \$8 and \$474 for three and nine months ended March 31, 2023, as compared to \$170 and \$503 for the same period in Fiscal 2022. Our effective tax rate (“ETR”) from continuing operations was 14% and 500% for the quarters ended March 31, 2023 and March 31, 2022, respectively. The decrease in income tax expense and effective tax rate was due to the following:

1. A \$81 reduction relating to GILTI tax provisions pursuant to final tax filings for Fiscal 2022.
2. Tax expense for three months ending March 31, 2022 included additional tax arising from tax assessments of prior periods.

The Company accrues penalties and interest related to unrecognized tax benefits when necessary, as a component of penalties and interest expense, respectively. The Company had no unrecognized tax benefits or related accrued penalties or interest expense at March 31, 2023.

In assessing the ability to realize the deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Based on these criteria, management believes it is more likely than not the Company will not realize the benefits of the federal, state, and foreign deductible differences. Accordingly, a valuation allowance has been established against deferred tax assets recorded in the U.S. and various foreign jurisdictions.

17. REVENUE

The Company generates revenue primarily from 3 different segments: Manufacturing, Testing and Distribution. The Company accounts for a contract with a customer when there is approval and commitment from both parties, the rights of the parties are identified, payment terms are identified, the contract has commercial substance and collectability of consideration is probable. The Company's revenues are measured based on consideration stipulated in the arrangement with each customer, net of any sales incentives and amounts collected on behalf of third parties, such as sales taxes. The revenues are recognized as separate performance obligations that are satisfied by transferring control of the product or service to the customer.

Significant Judgments

The Company's arrangements with its customers include various combinations of products and services, which are generally capable of being distinct and accounted for as separate performance obligations. A product or service is considered distinct if it is separately identifiable from other deliverables in the arrangement and if a customer can benefit from it on its own or with other resources that are readily available to the customer.

The Company allocates the transaction price to each performance obligation on a relative standalone selling price basis (“SSP”). Determining the SSP for each distinct performance obligation and allocation of consideration from an arrangement to the individual performance obligations and the appropriate timing of revenue recognition are significant judgments with respect to these arrangements. The Company typically establishes the SSP based on observable prices of products or services sold separately in comparable circumstances to similar clients. The Company may estimate SSP by considering internal costs, profit objectives and pricing practices in certain circumstances.

Warranties, discounts and allowances are estimated using historical and recent data trends. The Company includes estimates in the transaction price only to the extent that a significant reversal of revenue is not probable in subsequent periods. The Company's products and services are generally not sold with a right of return, nor has the Company experienced significant returns from or refunds to its customers.

Manufacturing

The Company primarily derives revenue from the sale of both front-end and back-end semiconductor test equipment and related peripherals, maintenance and support of all these products, installation and training services and the sale of spare parts. The Company's revenues are measured based on consideration stipulated in the arrangement with each customer, net of any sales incentives and amounts collected on behalf of third parties, such as sales taxes.

The Company recognizes revenue at a point in time when the Company has satisfied its performance obligation by transferring control of the product to the customer. The Company uses judgment to evaluate whether the control has transferred by considering several indicators, including:

- whether the Company has a present right to payment;
- the customer has legal title;
- the customer has physical possession;
- the customer has significant risk and rewards of ownership; and
- the customer has accepted the product, or whether customer acceptance is considered a formality based on history of acceptance of similar products (for example, when the customer has previously accepted the same equipment, with the same specifications, and when we can objectively demonstrate that the tool meets all the required acceptance criteria, and when the installation of the system is deemed perfunctory).

Not all indicators need to be met for the Company to conclude that control has transferred to the customer. In circumstances in which revenue is recognized prior to the product acceptance, the portion of revenue associated with its performance obligations of product installation and training services are deferred and recognized upon acceptance.

The majority of sales under the Manufacturing segment include a standard 12-month warranty which are mainly assurance warranty and are not separate performance obligations. Warranty provided for some customized products may be classified as service warranties and are separate performance obligations. Transaction prices are allocated to this performance obligation using cost plus method. The portion of revenue associated with warranty service is deferred and recognized as revenue over the warranty period, as the customer simultaneously receives and consumes the benefits of warranty services provided by the Company.

Testing

The Company renders testing services to manufacturers and purchasers of semiconductors and other entities who either lack testing capabilities or whose in-house screening facilities are insufficient. The Company primarily derives testing revenue from burn-in services, manpower supply and other associated services. SSP is directly observable from the sales orders. Revenue is allocated to performance obligations satisfied at a point in time depending upon terms of the sales order. Generally, there is no other performance obligation other than what has been stated inside the sales order for each of these sales.

Terms of contract that may indicate potential variable consideration include warranty, late delivery penalty and reimbursement to solve nonconformance issues for rejected products. Based on historical and recent data trends, it is concluded that these terms of the contract do not represent potential variable consideration. The transaction price is not contingent on the occurrence of any future event.

Distribution

The Company distributes complementary products made by manufacturers around the world. The Company recognizes revenue from product sales at a point in time when the Company has satisfied its performance obligation by transferring control of the product to the customer. The Company uses judgment to evaluate whether control has transferred by considering several indicators discussed above. The Company recognizes the revenue at a point in time, generally upon shipment or delivery of the products to the customer or distributors, depending upon terms of the sales order.

Contract Balances

The timing of revenue recognition, billings and collections may result in billed accounts receivable, unbilled receivables, contract assets, customer advances, deposits and contract liabilities. The Company's payment terms and conditions vary by contract type, although terms generally include a requirement of payment of 70% to 90% of total contract consideration within 30 to 60 days of shipment with the remainder payable within 30 days of acceptance. In instances where the timing of revenue recognition differs from the timing of invoicing, the Company has determined that its contracts generally do not include a significant financing component.

The following table is the reconciliation of contract balances.

	Mar. 31, 2023 (Unaudited)	Jun. 30, 2022

Assumptions

The fair value for the stock options granted to both employees and directors was estimated using the Black-Scholes option pricing model with the following weighted average assumptions, assuming:

- An expected life varying from 2.50 to 3.25 years, calculated in accordance with the guidance provided in SEC Staff bulletin No. 110 for plain vanilla options using the simplified method, since our equity shares have been publicly traded for only a limited period of time and we did not have sufficient historical exercise data at the grant date of the options;
- A risk-free interest rate varying from 0.11% to 4.17% (2022: 0.11% to 2.35%);
- No expected dividend payments and;
- Expected volatility of 47.3% to 73.85% (2022: 45.38% to 55.59%).

2017 Employee Stock Option Plan

The Company's 2017 Employee Plan permits the grant of stock options to its employees covering up to an aggregate of 300,000 shares of Common Stock. The Company's Board of Directors approved an amendment to the 2017 Employee Plan in December, 2021 to increase the shares covered thereby from 300,000 shares to an aggregate of 600,000 shares, which amendment was approved by the Company's shareholders at the annual meeting held in December 2021. Under the 2017 Employee Plan, all options must be granted with an exercise price of not less than fair value as of the grant date and the options granted must be exercisable within a maximum of ten years after the date of grant, or such lesser period of time as is set forth in the stock option agreements. The options may be exercisable (a) immediately as of the effective date of the stock option agreement granting the option, or (b) in accordance with a schedule related to the date of the grant of the option, the date of first employment, or such other date as may be set by the Compensation Committee. Generally, options granted under the 2017 Employee Plan are exercisable within five years after the date of grant and vest over the period as follows: 25% vesting on the grant date and the remaining balance vesting in equal installments on the next three succeeding anniversaries of the grant date. The share-based compensation will be recognized in terms of the grade method on a straight-line basis for each separately vesting portion of the award. Certain option awards provide for accelerated vesting if there is a change in control (as defined in the 2017 Employee Plan).

Trio-Tech International ("TTI") was incorporated in 1958 under the laws of the State of California. As used herein, the term "Trio-Tech" or "Company" or "we" or "us" or "Registrant" includes Trio-Tech International and its subsidiaries unless the context otherwise indicates. Our mailing address and executive offices are located at Block 1008 Toa Payoh North, Unit 03-09 Singapore 318996, and our telephone number is (65) 6265 3300.

The Company is a provider of reliability test equipment and services to the semiconductor industry. Our customers rely on us to verify that their semiconductor components meet or exceed the rigorous reliability standards demanded for automotive electronics, industrial electronics, computing and data storage, consumer electronics, and communication markets. We act as a global one-stop solution for our customers by designing and building reliability test solutions, and offering comprehensive testing services through our testing laboratories in Asia and the United States ("U.S.").

During the nine months ended March 31, 2023, TTI generated approximately 100% of its revenue from its three core business segments in the test and measurement industry, i.e., manufacturing of test equipment ("Manufacturing"), testing services ("Testing") and distribution of test equipment and electronic components ("Distribution").

Manufacturing

TTI develops and manufactures an extensive range of test equipment used in the "front-end" and the "back-end" manufacturing processes of semiconductors. Our equipment includes leak detectors, autoclaves, centrifuges, burn-in systems and boards, HAST testers, temperature-controlled chucks, and more. We also act as an extended development team of Integrated Device Manufacturers (IDMs) and Fabless semiconductor companies in the testing processes with our expert technical skills, especially in the New Product Introduction (NPI) process.

Testing

TTI provides comprehensive electrical, environmental, and burn-in testing services to semiconductor manufacturers in our testing laboratories in Asia and the United States ("U.S."). Our customers include both manufacturers and end users of semiconductors and electronic components who look to us when they decide to outsource their testing process. We also support the asset-light strategy of our customers by setting up test facilities and providing component level, package level and system level testing services with expert technology that improves the productivity of our customers. The independent tests are performed to industry and customer specific standards.

The products include environmental chambers, mechanical shock & vibration testers, and other semiconductor equipment. Besides equipment, we also distribute a wide range of components such as connectors, sockets, cables, LCD display and touch screen panels. We act as value-added resellers by enhancing the value of the distributed products by customizing them to the needs of our customers through our expert engineering, integration, and sub-assembly services. We also support our customers as their extended research & development arm in product designing, by leveraging the expert skills of our component engineers and design engineers.

Real Estate

Our real estate segment generates investment income from the investments made and rental revenue received from real estate that we purchased in Chongqing, China.

Critical Accounting Estimates & Policies

The preparation of our Condensed Consolidated Financial Statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions in applying our accounting policies that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We base these estimates and assumptions on historical experience and evaluate them on an ongoing basis to ensure that they remain reasonable under current conditions. Actual results could differ from those estimates. We discuss the development and selection of the critical accounting estimates with the Audit Committee of our Board of Directors on a quarterly basis, and the Audit Committee has reviewed our related disclosure in this Quarterly Report on Form 10-Q.

There have been no material changes in our critical accounting estimates and policies since our Annual Report on Form 10-K for the fiscal year ended June 30, 2022. Refer to Note 1 “Basis of Presentation and Summary of significant Accounting Policies” to our Condensed Consolidated Financial Statements for additional details. In addition, please refer to “Management’s Discussion and Analysis of Financial Condition and Results of Operations” contained in Part II, Item 7 of our Annual Report on Form 10-K for our fiscal year ended June 30, 2022 for a complete description of our critical accounting policies and estimates.

Total	<u>100.0%</u>	<u>100.0%</u>	<u>100.0%</u>	<u>100.0%</u>

Revenue for the three and nine months ended March 31, 2023, was \$9,842 and \$34,171, respectively, a decrease of \$1,296 and an increase of \$1,940, respectively, when compared to the revenue for the same period of Fiscal 2022. As a percentage, revenue decreased by 11.6% and increased by 6% for the three and nine months ended March 31, 2023, when compared to revenue for the same period of Fiscal 2022.

For the three months ended March 31, 2023, there was an increase in revenue in the Testing segment when compared to the same period of Fiscal 2022. The Manufacturing and Distribution segment’s revenue decreased compared to the same period of Fiscal 2022. For the nine months ended March 31, 2023, there was an increase in revenue in the Manufacturing and Testing segments when compared to the same period of Fiscal 2022. The Distribution segment’s revenue decreased compared to the same period of Fiscal 2022.

Total revenue into and within China, the Southeast Asia regions and other countries (except revenue into and within the U.S. decreased by \$1,208 (or 11%), to \$9,719 and increased by \$1,970 (or 6.3%) to \$33,232 for the three and nine months ended March 31, 2023, respectively, as compared with \$10,927 and \$31,262 for the same period of Fiscal 2022, respectively.

Total revenue into and within the U.S. was \$123 and \$937 for the three and nine months ended March 31, 2023, respectively, a decrease of \$99 and \$51 from \$222 and \$988 for the same periods of Fiscal 2022, respectively.

Revenue within our four current segments for the three and nine months ended March 31, 2023, is discussed below.

Manufacturing Segment

Revenue in the Manufacturing segment as a percentage of total revenue was 30.1% and 33.9% for the three and nine months ended March 31, 2023, respectively, an increase of 2.3% of total revenue when compared to 27.8% and 31.6% in the same period of Fiscal 2022. The absolute amount of revenue decreased by \$134 to \$2,963 from \$3,097 for three months ended March 31, 2023 due to decrease in burn-in-board sales in Singapore operation. On the other hand, the absolute amount of revenue increased by \$1,405 to \$11,592 from \$10,187 for the nine months ended March 31, 2023 mainly attributed to increased board and system sales in the first half of Fiscal 2023 compared to the same period of Fiscal 2022.

Revenue in the Manufacturing segment from one customer accounted for 44.6% and 55.8% of our total revenue in the Manufacturing segment for the three months ended March 31, 2023, and 2022, respectively, and 32.4% and 46.2% of our total revenue in the Manufacturing segment for the nine months ended March 31, 2023, and 2022, respectively.

Testing Services Segment

The Testing segment's revenue was 57.9% for the three months ended March 31, 2023, representing an increase of 18.3%, compared to 39.6% for the same period of Fiscal 2022. Revenue in the Testing segment was 51.8% as a percentage of total revenue for the nine months ended March 31, 2023, an increase of 8.4% compared to the same period of Fiscal 2022. The absolute amount of revenue increased by \$1,280 to \$5,697 and increased by \$3,726 to \$17,709 from \$4,417 and \$13,983 for the three and nine months ended March 31, 2023, respectively, as compared to the same periods of Fiscal 2022. The increase is mainly attributed to the new subsidiary in China which was not yet operational in the same period of Fiscal 2022. The increase was partially offset by a drop in volume in other test plants due to the lower demand resulting from weakening of global semiconductor industry.

The revenue in the Testing segment from one customer accounted for 41.6% and 59.5% of our revenue in the Testing segment for the three months ended March 31, 2023 and 2022, respectively, and 44.3% and 62.1% of our total revenue in the Testing segment for the nine months ended March 31, 2023 and 2022, respectively. The future revenue in the Testing segment will be affected by the demands of this customer if the customer base cannot be increased. Demand for testing services varies from country to country, depending on any changes taking place in the market and our customers' forecasts. As it is challenging to forecast fluctuations in the market accurately, management believes it is necessary to maintain testing facilities in close proximity to the customers in order to make it convenient for them to send us their newly manufactured parts for testing and to enable us to maintain a share of the market.

Distribution Segment

Revenue in the Distribution segment was 12.0% and 14.2% as a percentage of total revenue for the three and nine months ended March 31, 2023, respectively, a decrease of 20.5% and 10.7%, compared to the same period of Fiscal 2022. The absolute amount of revenue decreased by \$2,441 to \$1,179 and by \$3,183 to \$4,855 from \$3,620 and \$8,038 for the three and nine months ended March 31, 2023, respectively, compared to the same period of Fiscal 2022. The decrease is mainly due to inventory adjustments made by our end customers who are currently carrying excess inventory, due to which demand is weak and deliveries are being pushed out to next fiscal year.

The revenue in the Distribution segment from one customer accounted for 66.8% and 82.2% of our revenue in the Distribution segment for the three months ended March 31, 2023 and 2022, respectively, and 78.7% and 77.9% of our total revenue in the Distribution segment for the nine months ended March 31, 2023 and 2022, respectively. Demand for the Distribution segment varies depending on the demand for our customers' products, the changes taking place in the market, and our customers' forecasts. Hence it is difficult to forecast fluctuations in the market accurately.

Real Estate Segment

The Real Estate segment revenue decreased to \$3 and \$15 from \$4 and \$23 for the three and nine months ended March 31, 2023, compared to the same period of Fiscal 2022.

Uncertainties and Remedies

There are several influencing factors which create uncertainties when forecasting performance, such as the constantly changing nature of technology, specific requirements from the customer, decline in demand for certain types of burn-in devices or equipment, decline in demand for testing services and fabrication services, and other similar factors. One factor that influences uncertainty is the highly competitive nature of the semiconductor industry. Another is that some customers are unable to provide a forecast of the products required in the upcoming weeks; hence it is difficult to plan for the resources needed to meet these customers' requirements due to short lead time and last-minute order confirmation. This will normally result in a lower margin for these products as it is more expensive to purchase materials in a short time frame. However, the Company has taken certain actions and formulated certain plans to deal with and to help mitigate these unpredictable factors. For example, in order to meet manufacturing customers' demands upon short notice, the Company maintains higher inventories but continues to work closely with its customers to avoid stockpiling. We believe that we have improved customer service through our efforts to keep our staff up to date on the newest technology and stressing the importance of understanding and meeting the stringent requirements of our customers. Finally, the Company is exploring new markets and products, looking for new customers, and upgrading and improving burn-in technology while at the same time searching for improved testing methods for higher technology chips.

The Company's primary exposure to movements in foreign currency exchange rates relates to non-U.S. dollar-denominated sales and operating expense in its subsidiaries. Strengthening of the United States dollar ("U.S. Dollar") relative to foreign currencies adversely affects the U.S. Dollar value of the Company's foreign currency-denominated sales and earnings, and generally leads the Company to raise international pricing, potentially reducing demand for the Company's products. Margins on sales of the Company's products in foreign countries and on sales of products that include components obtained from foreign suppliers could be materially adversely affected by foreign currency exchange rate fluctuations. In some circumstances, for competitive or other reasons, the Company may decide not to raise local prices to fully offset the U.S. Dollar's strengthening, or at all, which would adversely affect the U.S. Dollar value of the Company's foreign currency-denominated sales and earnings. Conversely, a strengthening of foreign currencies relative to the U.S. Dollar, while generally beneficial to the Company's foreign currency denominated sales and earnings, could cause the Company to reduce international pricing, thereby limiting the benefit. Additionally, strengthening of foreign currencies may also increase the Company's cost of product components denominated in those currencies, thus adversely affecting gross margins.

As of March 2023, although we have seen improvements in both our operations and those of our suppliers, we may continue to experience supply shortages as well as inflationary cost pressures in at least the near term. Risks and uncertainties related to the COVID-19 pandemic, supply chain challenges, and inflationary pressures may continue to negatively impact our revenue and gross margin. We continue to monitor and evaluate the business impact to react proactively.

On August 9, 2022, the CHIPS and Science Act of 2022 (CHIPS Act) was enacted in the United States. The CHIPS Act will provide financial incentives to the semiconductor industry which are primarily directed at manufacturing activities within the United States. We continue to evaluate the business impact and potential opportunities related to the CHIPS Act. As of date, we do not see any direct effect of the CHIPS Act on the Company in the foreseeable future.

There are legal and operational risks associated with having operations in China. These risks could result in a material change in our operations and/or the value of our common stock or could limit or hinder our ability to offer or continue to offer securities to investors and cause the value of such securities to significantly decline or be worthless. In recent past, the Peoples Republic of China ("PRC") government initiated a series of regulatory actions and statements to regulate business operations in China with little advance notice, including cracking down on illegal activities in the securities market, enhancing supervision over China-based companies listed overseas using variable interest entity structure, adopting new measures to extend the scope of cybersecurity reviews, and expanding the efforts in anti-monopoly enforcement.

The Company and its subsidiaries do not have any variable interest entities based in China. Our business primarily consists of semiconductor testing and burn-in services for the automotive industry, avionics, and others. Our businesses are not impacted by anti-monopoly policies, variable interest entities policies, or data security policies, nor are our businesses subject to extraordinary oversight from the Chinese government.

Gross profits in the Manufacturing segment decreased by \$55 to \$512 for the three months ended March 31, 2023, from \$567 for the same period in Fiscal 2022. The decrease in gross profit margin was primarily due to a lower sales for the three months ended March 31, 2023 compared to the same period of Fiscal 2022.

Gross profit margin as a percentage of revenue in the Testing segment increased by 2.5% to 30.8% for the three months ended March 31, 2023, compared to 28.3% in the same period of Fiscal 2022. The increase in gross profit margin percentage was mainly due to higher proportion of high-margin services coupled with effective cost control measures, mainly in Malaysia, China, and Thailand operations. In absolute dollar amounts, gross profit in the testing segment increased by \$519 to \$1,757 for the three months ended March 31, 2023, from \$1,248 for the same period of Fiscal 2022.

Gross profit margin of the Distribution segment is not only affected by the market price of the products we distribute, but also the mix of products we distribute, which frequently changes as a result of fluctuations in market demand. Gross profit margin as a percentage of revenue in the Distribution segment decreased by 1.3% to 17.3% for the three months ended March 31, 2023, from 18.6% in the same period of Fiscal 2022. Gross profit in the Distribution segment for the three months ended March 31, 2023, was \$204, a decrease of \$472, compared to \$675 in the same period of Fiscal 2022. The decrease in gross profit was primarily due to a lower sales for the three months ended March 31, 2023 compared to the same period of Fiscal 2022, due to inventory adjustments by customers.

For the three months ended March 31, 2023, gross loss in the Real Estate segment was \$15, as compared to \$16 for the same period of Fiscal 2022.

Operating Expense

Operating expense for the three months ended March 31, 2023 and 2022 was as follows:

	Three Months Ended March 31,	
	2023 (Unaudited)	2022 (Unaudited)
General and administrative	\$ 2,248	\$ 2,378
Selling	160	146
Research and development	87	80
Gain on disposal of property, plant and equipment	-	-
Total	\$ 2,495	\$ 2,604

General and administrative expense decreased by \$130 or 5.5%, from \$2,378 to \$2,248 for the three months ended March 31, 2023, compared to the same period of Fiscal 2022. The decrease in general and administrative expense was mainly attributable to the decrease in stock compensation costs and effective cost control in China operations.

Selling expense increased by \$14 or 9.6%, from \$146 to \$160 for the three months ended March 31, 2023, compared to the same period of Fiscal 2022. The increase in selling expense was primarily attributable to an increase in commission costs in the Manufacturing segment of the Singapore operations as a result of an increase in commissionable revenue, and an increase in travel costs due to increased business travel in the third quarter of Fiscal 2023, compared to the same quarter of Fiscal 2022.

Loss from Operations

Loss from operations was \$37 for the three months ended March 31, 2023, a decrease of \$93, compared to loss of \$130 from operations for the same period of Fiscal 2022. This was mainly due to a decrease in general and administrative expenses.

Interest Expense

Interest expense for the three months ended March 31, 2023 and 2022 were as follows:

	Three Months Ended March 31,	
	2023	2022

Total	\$ 123	\$ 127

Other income decreased marginally by \$4 from \$127 to other expenses of \$123 for the three months ended March 31, 2023 compared to the same period in Fiscal 2022. The decrease was mainly contributed by a negative foreign currency impact in the third quarter of Fiscal 2023, partially offset by an increase in interest income compared to the same period in Fiscal 2022.

Income Tax Expense

The Company's income tax expense was \$8 and \$170 for the three months ended March 31, 2023 and 2022, respectively. The decrease was primarily due to tax provision adjustments made pursuant to tax filings for Fiscal 2022.

Non-controlling Interest

As of March 31, 2023, we held a 55% interest in Trio-Tech (Malaysia) Sdn. Bhd., Trio-Tech (Kuala Lumpur) Sdn. Bhd., SHI International Pte. Ltd., and 52% interest in PT. SHI Indonesia. We also held a 76% interest in Prestal Enterprise Sdn. Bhd and 51% interest in Trio-Tech JiangSu Co. Ltd. The share of non-controlling interest in the net profit from the subsidiaries for the three months ended March 31, 2023 was \$61, an increase of \$98 compared to the share of non-controlling interest in the net loss from the subsidiaries of \$37 for the same period of Fiscal 2022. The increase in the net income shared by non-controlling interest in the subsidiaries was attributable to the increase in net income generated by the China operation.

Net Loss Attributable to Trio-Tech International Common Shareholders

Our net income is impacted by the overall strengthening or weakening of the US dollars since the functional currency of our foreign subsidiaries is not the U.S. Dollars. During the second quarter in Fiscal 2023, exchange rate movement negatively impacted our net income due to the strengthening of Singapore dollars against the U.S. Dollar which was partially offset by the exchange gain that arose in the first quarter of fiscal 2023.
